## Computer Ratings released 20th April 2007

### **\*\*\* System Upgrade Announcement \*\*\***

The TTQ ratings have now been uploaded to the RatingsCentral database and adjusted to be consistent with the Stiga World Ratings. The adjustment was an **increase in 100 points** but the inclusion of international events and increases to the initial standard deviations mean that the exact changes will vary from player to player. The accuracy of the ratings will be improved. Many additional features are now available on the RatingsCentral website including:

- clubs can download tournament management software Zermelo incorporating the latest rating;
- clubs can enter their own results directly and the ratings are normally updated within 5 minutes;
- comparison with international players; and
- historical records for every player including progress chart, head-to-head records and match listings.

**NOTE: There have been changes for standard deviation cut-off and suggested grading cut-off for 2007.**

## Data Entry by Clubs

Data can be submitted to RatingsCentral who administer the Stiga World Ratings by registering as a tournament director at <http://www.ratingscentral.com/Registration.php> , and then sending the results using one of two programs downloaded from <http://www.ratingscentral.com/Instructions.php> .

1. Data is submitted automatically using the tournament management software Zermelo.
2. Data can be entered and submitted using the software Cantor.

Short guidelines for using either software are available from the TTQ office or Andrew Martin at [amartin9@bigpond.net.au](mailto:amartin9@bigpond.net.au).

## Submission of Results to TTQ

In order to minimise the risk of error, it is important that clubs submitting results ensure the following.

- Provide a list of players including first names.
- Ensure that, if a match was not played, the score is indicated as a walkover (w/o).
- If a player forfeits during a match, the score is indicated. For example if a player withdraws when the score is 5-5 in the first game, the score is indicated as 11-5, 11-0. These will be in the calculations.

Any questions or suggestions can be forwarded to Stanley Chan 0423 035 708 or [schan\\_physics@yahoo.com.hk](mailto:schan_physics@yahoo.com.hk)

## Key points on how the ratings work

- All results from singles events are entered.
- Your rating improves when you win a match and the amount depends on the difference between your rating and the loser's rating. The loser's rating will be reduced by a similar amount.
- The rating changes also depend on the uncertainty or standard deviation of both players' rating (see below).
- The status of the event and the stage of the event are not considered.
- No weightings are given for playing more often as this reduces the accuracy of the list.

## Standard Deviation (Reviewed and updated 2007)

- RatingsCentral system calculates the standard deviation of each player's rating and uses it to weight the importance of the match when calculating a player's new rating.
- Standard deviation can be explained in simple terms by saying that there is a 2/3 certainty that the actual playing strength of a player with rating 1550 and standard deviation of 50 is between 1500 and 1600.
- New players have a large standard deviation and matches against these players are weighted low. As they play more matches their standard deviation reduces. When a player does not play, their standard deviation increases.
- For most events, the rating of new players is initialised as 1550 with a standard deviation of 400.

Standard deviation	Accuracy
50	Good
100	Okay
Over 100	Less accurate and not published

## Purpose of Ratings (Reviewed and updated 2007)

The ratings, rather than the order, are predictions of players' standard. Tournament organisers may wish to consider the ratings when seeding and grading players for tournament draws.

To the right are suggested ceilings for each grade that can be used as a guide to grades that a player would normally be eligible for. These are intended to provide consistency across Queensland. They are the same for male and female to allow the option of combining events. The outcome is a compromise between the number of players in each grade and the difference in standard in each grade.

## Ratings Central: Ratings for the 21st Century

Local, Regional, and Worldwide Rankings; Easy-to-Use and Powerful Website;  
Instant Posting; High Accuracy

The purpose of Ratings Central is to make ratings more immediate and exciting for all table tennis players, while making it as simple as possible for event directors to submit events. To accomplish this, we have developed a state-of-the-art, fully automated, online rating system.

Regardless of whether your club currently has its own ratings or rankings, now you can use Ratings Central to produce ratings for your club, thus allowing your members to find out how they rank not only within your own club, but also in your state, country, and even internationally.

You can submit results from almost any type of event that you or your club runs, including tournaments, league matches, and club matches. There are no fees to submit results from table tennis events in North America to Ratings Central. In particular, there are no sanction fees, no rating fees, and no player membership fees.

Finding your new rating and those of your friends is simple thanks to our attractive, easy-to-navigate website that provides a wealth of information. Ratings and match results are easy to browse and copiously hyperlinked. There are a multitude of options for searching for and listing players, events, clubs, and matches. Your results will be posted alongside results from international competitions from many countries, including Sweden, Germany, Japan, and France.

Data entry is a snap thanks to the easy-to-use Windows apps that we provide (you can also use a Mac if you have Virtual PC): Click a button to automatically download a rating list from our website. Select the players that are playing in your event. To enter a result, click a button and highlight the names of the winner and loser. To submit the results to Ratings Central, click a button and the event is automatically submitted.
